NOTE:

In the early 1970s rules makers declared that “all measurements of height or distance shall be recorded to the lesser quarter-inch in measurements of less than 100 feet; and to the lesser inch in all measurements over 100 feet (hammer, javelin, discus). Examples: A reading of 6-7<sup>3</sup>/<sub>8</sub> should be recorded as 6-7<sup>1</sup>/<sub>4</sub> and a reading of 24-7<sup>5</sup>/<sub>8</sub> as 24-7<sup>1</sup>/<sub>2</sub>, but 181-0<sup>3</sup>/<sub>4</sub> should be recorded as 181-0 and 227-7<sup>7</sup>/<sub>8</sub> as 227-7.

When I started my research I used this ruling for all marks even those before the 1970s.
